

How Fore Tour Works

A simple guide for organisers and players, from setting up your first event to reading the final leaderboard.

For Organisers

1. Create your event

Sign up with your name and email, then tap **New Event**. The setup wizard takes you through four short steps:

- **Event details:** give the event a name and set the start and end dates.
- **Players and rounds:** how many players and how many rounds. You can change both later.
- **Round setup:** search for the course, pick the tees, the format (Stableford or Net Stroke Play) and the scoring mode (Individual or Texas Scramble). If the course or combination you want isn't listed, tap **Can't find it? Search all courses**, or **Request a course** and we'll add it for you.
- **Summary:** check everything, add a promo code if you have one, then pay, or save it as a draft and pay later.

Name your event, then search for your course. Every loop and combination at multi course venues is listed.

Pick your tees, format and scoring mode, then check the summary and price before you pay.

Pricing is per player, per round, and the summary shows the total before you pay. You can pay by card, Apple Pay, Revolut Pay or bank transfer.

2. Your event dashboard

Everything for the event lives on one page: players, rounds, the league table, the join QR code, branding, trip teams and the prize pot. Tap any round to open its settings, leaderboard and scorecard.

Your branded event dashboard, and the QR code and link players use to join.

3. Add your players

Tap **+** on the Players screen. Enter each player's name and either their **WHS handicap index** (Fore Tour works out the playing handicap for the course and tees) or a **playing handicap** directly, if your society uses its own. Plus handicaps are fine: use the **+** key.

The left screenshot shows the 'Add Player' form. It has a 'Name' field with 'Player A' entered. Below it are two tabs: 'WHS (Index)' (selected) and 'PH (Direct)'. Under the 'WHS (Index)' tab, there is a 'WHS Handicap Index' field with '10.1' entered. Below this is a numeric keypad with digits 1-9, a decimal point, and a '+' sign. At the bottom of the keypad is a 'Done' button. Below the keypad is a 'Team / group (optional)' dropdown menu with 'None (unassigned)' selected. At the very bottom is a '+ Add Player' button.

The right screenshot shows the 'Players' list. It has a title bar with a back arrow, 'Players', and 'Corporate Day'. Below the title bar is a list of players, each with a circular icon containing initials, a name, and a handicap. The players are: Player D (+3.7), Player C (1.1), Player A (10.1), Player H (16.2), Player E (18.6), Player G (23.9), Player B (PH 28 (manual)), and Player F (PH 36 (manual)). At the bottom right is a green circular button with a white '+' sign.

Add a player by WHS index or playing handicap. Manual playing handicaps are marked so you can tell them apart.

4. Set up each round

Open a round and tap **Round settings**. From here you can:

- **Change the course or tees** at any time before scoring starts.
- **Choose the format:** Stableford (points per hole, highest total wins) or Net Stroke Play (gross minus handicap, lowest wins).
- **Team scoring:** turn it on or off, and choose how many scores count on each par 3, 4 and 5, for example all on par 3s and best two on par 4s and 5s.
- **Scoring mode:** Individual, where everyone plays their own ball, or Texas Scramble, where the team picks the best shot each hole.
- **Player tees:** move individual players to different tees, for example forward tees for some players. Their playing handicap updates automatically, unless it was set manually.

Scoring Format

Stableford
Points per hole, highest total wins.

Net Stroke Play
Gross strokes - handicap. Lowest net wins. Individual only.

Team Scoring

Trip default (On) On Off

Scores Counting

Par 3 Par 4 Par 5

All 2 2

How many player scores count toward the team total on each par.

Scoring Mode

Individual
Each player scores their own ball.

Texas Scramble
Team picks best shot each hole.

Player Tees

Override individual tees. Default: Amarillas

Player A PH11 Round default

Player B PH28 Round default

PH manually set -- tee change won't affect handicap

Player C PH10 Round default

Player D PH46 Round default

Player E PH20 Rojas - CR 70.3 S

Player F PH36 Round default

PH manually set -- tee change won't affect handicap

Player G PH27 Round default

Player H PH18 Round default

Settings

Round Name

Round 1

Choose the format and team scoring, and set different tees for individual players.

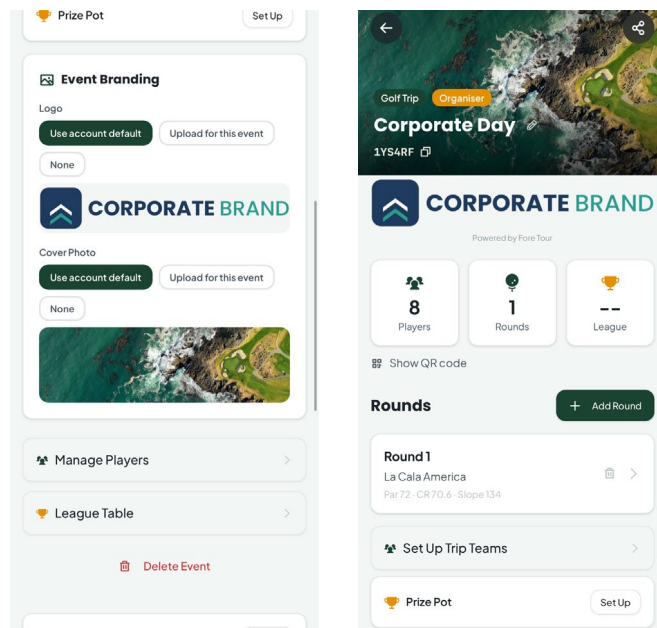

Texas Scramble. Fore Tour works out each team's handicap from the players' playing handicaps using the scramble allowances (25%, 20%, 15% and 10% by default), and tracks whose drive was used on each hole against the minimum drives you set for each player.

5. Brand your event

Clubs and companies can put their own logo and course photo on an event. In the **Event Branding** card, choose for the logo and the cover photo:

- **Use account default:** the logo and photo saved on your account, applied to all your events.
- **Upload for this event:** a different logo or photo for this event only, for example a sponsor's logo on a corporate day.
- **None:** no logo, or the standard Fore Tour photo.

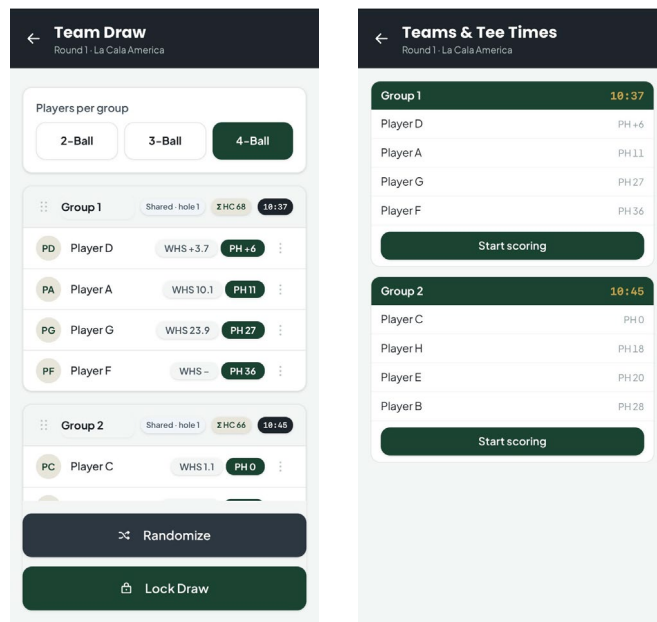

The logo appears on the join screen, the event page and the leaderboard, with a small "Powered by Fore Tour" line underneath.

Upload a logo and cover photo, and they appear across the event.

6. Draw your groups

Tap **Team Draw**, choose 2, 3 or 4 balls, then **Randomize** for handicap balanced groups. Drag players between groups if you want to change anything, then tap **Lock Draw**. Each group gets its tee time automatically, and everyone can see the groups and times under **Teams & Tee Times**.

Randomise balanced groups, lock the draw, and every group gets its tee time.

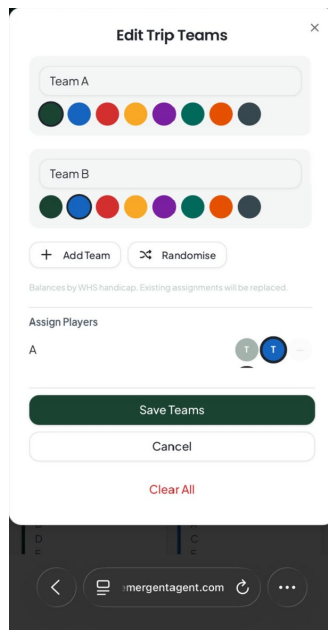

7. Set up Trip Teams (optional)

This is different from the groups above. Groups decide who plays together each round. Trip Teams decide which side each player is on for the whole event, for example Greens v Blues across every round. Tap **Set Up Trip Teams**, add two or more teams, then tap a player's bubble to assign them. Tap Randomise to split everyone into balanced teams by handicap. This replaces any existing

Fore Tour Ltd
Registered in England and Wales (No. 17367738)
119 Langley Way | West Wickham | BR4 0DL | United Kingdom

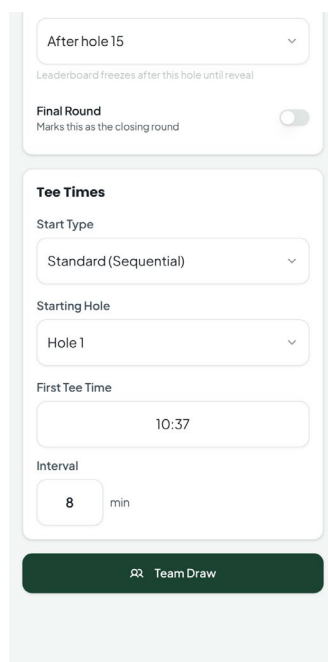

assignments, so it's best used before you've hand picked anyone. Team totals appear on their own tab on the league table.

Assign players to fixed teams for the whole event, or tap Randomise for a balanced split.

8. Set your tee times

In round settings, choose a start type: **Standard (Sequential)** for a normal tee sheet, **Shotgun Start** for every group starting on a different hole at once, or **Split Tee** for starting on the 1st and 10th. Set the starting hole, the first tee time and the gap between groups. Players see their own tee time in the app, so there's nothing to print.

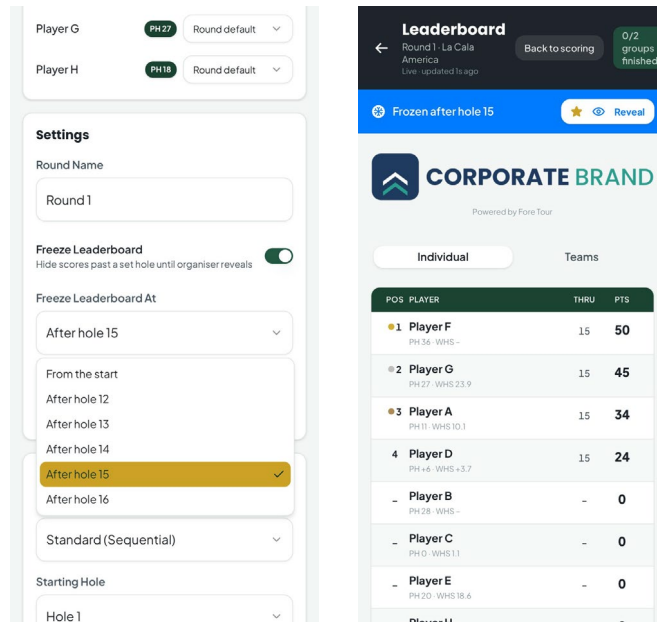

Set the start type, first tee time and interval. Players see their time in the app.

9. Build suspense with a frozen leaderboard

Turn on **Freeze Leaderboard** and choose when it freezes: from the start, or after hole 12 to 16. Players keep scoring as normal, but the leaderboard stops updating at that hole, so nobody knows the result until you tap **Reveal**, ideally in the clubhouse with everyone watching. Mark the last round of a multi round event as the **Final Round** so the final draw is seeded from the standings.

Choose the freeze hole, then reveal the result when you're ready.

10. Share the join link

Every event has its own join code, link and QR code on the event page. Players scan or tap the link and they're in, with no account or app download needed. The **player code** players use to enter scores is shown once, when you create the event, so make a note of it to pass on.

Important: check the course, tees, format and draw before the first group starts scoring.

For Players

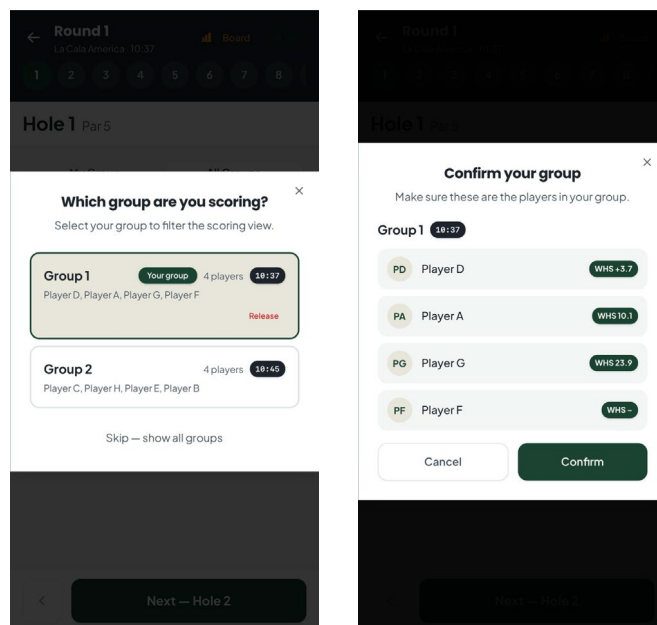

1. Join the event

Scan the QR code or tap the link your organiser sent you. No sign up and no app download: it works straight in your phone's browser.

Tip: add Fore Tour to your home screen (Share, then Add to Home Screen on iPhone). It opens like an app and you'll always find your event, even if you clear your browser history.

2. Pick your group

When you open the round, choose the group you're scoring for and confirm the players. The scoring screen then shows just your group. Only one person per group needs to score; everyone else can keep their phone in the bag.

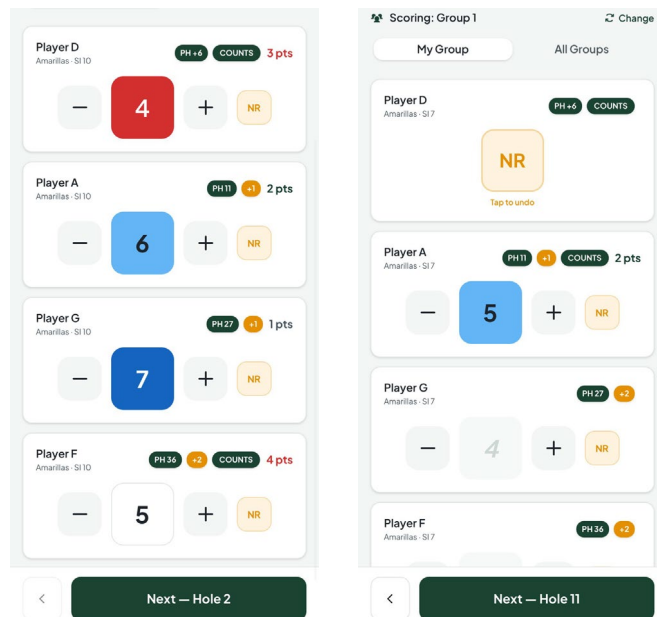

Choose your group and confirm the players before you start.

3. Score each hole

Tap **+** or **-**, or tap the number to type it in. Stableford points appear as you go, and you can see who gets shots on each hole (+1, +2). When team scoring is on, **COUNTS** shows which scores count for the team. If a player picks up, tap **NR**. Tap any hole number at the top to go back and fix a mistake.

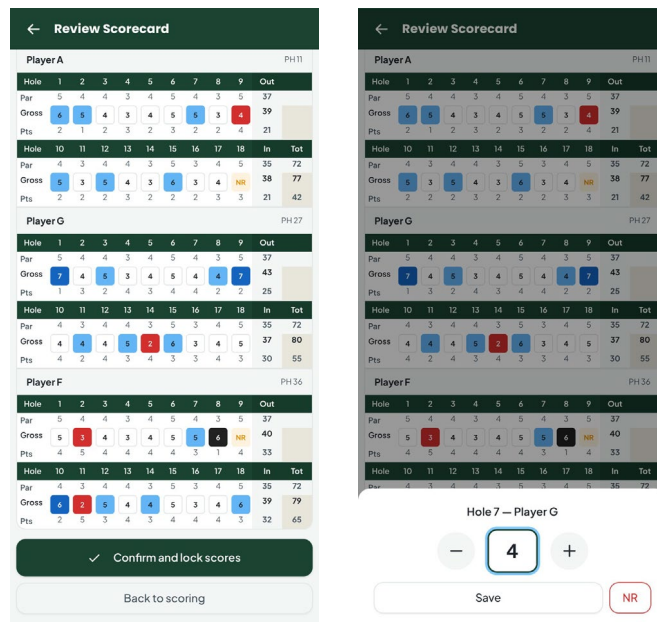

Scores save as you go, so you don't need to keep the app open between holes or carry a paper card.

Enter scores hole by hole. Points, shots and counting scores update as you go.

4. Review and lock your card

After the 18th, the **Review Scorecard** shows every player's front and back nine, gross scores and points. Tap any score to correct it, then tap **Confirm and lock scores**. Once locked, the card can't be changed, so give it a final check first.

Check every card, tap a score to correct it, then confirm and lock.

5. Follow the leaderboard

The leaderboard updates live as each group scores. Switch between **Individual** and **Teams**, see how many holes each player has played, and how many groups have finished. If your organiser has frozen it, you'll see the standings at the freeze hole until the big reveal.

For Multi Round Events and Societies

Running more than one round? Fore Tour keeps a league table across every round, split by format, so a Stableford leader and a stroke play leader are never mixed into one meaningless number.

For the last round, turn on **Final Round** in that round's settings. Once every earlier round in the same format has been revealed, Fore Tour seeds the draw from the overall standings: the leaders play together in the last group, so the result is still live when they go out. Group sizes match earlier rounds. Until the standings are ready you'll see "Waiting for prior rounds to be revealed" instead of a draw.
